

DOPPLER ULTRASOUND SCAN OF THE RENAL ARTERIES

DATE OF PROCEDURE	
TIME OF ARRIVAL AT THE RECEPTION DESK	

(The examination may be delayed because of the nature of the procedure.)

No referral is required.

The procedure examines the morphology of the renal arteries, the blood flow ratios in the trunks of the renal arteries, and renal blood flow. It evaluates the blood flow rate and direction in the blood vessels.

Description of the procedure

Non-invasive

Duration: 15–20 minutes

HOW TO PREPARE FOR YOUR APPOINTMENT:

The day before the procedure:

Eat a light diet with no vegetables, fruit, or whole-grain bread.

If you are obese or suffer from flatulence, take 3 x 2 capsules of Espumisan.

6 hours before your appointment:

Do not eat or drink anything (fast).

Examination results

The examination report and images will be available immediately after the procedure.
